60 mhz has it's very own genre.a blend of metaphoric lyrics over deep rumbling basslines. It is the god child of soul, funk, hip-hop, and rock. 13 MP3 Songs URBAN/R&B: Funk, HIP HOP/RAP: Alternative Hip Hop Details: Yes, yes Im Lennon and Im a new artist with a new genre. First Ill tell you a little about myself and then a little about my music. I was born and raised in Flint, Michigan, which is actually a crazy little city. My mom raised me along with my little brother and sister (Love you, Mom!). My dad left when I was real young so I never really knew him and that really made our lives hard. I guess I can thank him for giving me nothing because I work harder to make a life for myself. You can actually feel that motivation in a lot of my music. Ive been in music ever since I was very young, too. I started off in gospel and at about 12 I was exposed to old school rhythm and blues, jazz and classical music. I learned to play bunch of different instruments and eventually started listening to other types of music from there. Funk, Hip-hop, Soul became my mentors and I began developing my own sound. 60mhz was born out of a bet as a matter of fact. I usually record soulish funk with a rock edge but a group of artists in Michigan wanted me to put together some tracks for them for an album. They didnt bring the money to buy the tracks upon completion so I laid my own lyrics and voila a real wild child was born in the basement! Follow the light
