

Helicopter Maneuvers Manual: A Step-by-step Illustrated Guide To Performing All Helicopter Flight Operations - Ryan Dale

An excellent resource for students and flight instructors alike, the Helicopter Maneuvers Manual helps pilots acquire a mental picture of each phase of flight. With this comprehensive visual guide, author Ryan Dale has captured his countless hours spent at the whiteboard in full-color illustrations that show exactly what to do or expect in each part of a maneuver. Providing a detailed look at helicopter maneuvers, the information in this guide helps to solidify concepts gained from flight training in a student pilot's mind by incorporating the Practical Test Standards into every maneuver description. The graphical and textual explanations work in conjunction with an instructor's lessons, allowing students to prepare before sessions and to review afterwards as well. Because helicopter pilots must rely on their memory or understanding of a particular maneuver, the Helicopter Maneuvers Manual provides readers with a crystal-clear picture of what level of performance is expected of them every step and includes insights into the common errors associated with each move. Applicable to all helicopter models, the book also features tips for the popular Robinson R22. Author: Dale, Ryan Publisher: Aviation Supplies & Academics, Inc.
