

Microarrays In Inflammation

[DOWNLOAD HERE](#)

Microarray and inflammation: an introduction.- Whole blood.- Separation of whole blood cells and its impact on gene expression.- Skin and skin models.- Adipose tissue.- Samples isolated by flow cytometry.- Magnetic cell sorting.- T7 based amplification protocols.- Amplification of cDNA from single or rare cells by global PCR (exponential amplification).- Gene expression patterns in asthma.- Gene expression profiling in neurological and neuroinflammatory disorders.- Aspects of gene expression in B-cell lymphomas.- The genes behind rheumatology.- miRNA patterns in hematopoietic malignancies.- Keep it simple: microarray cross-platform comparison without statistics.- Microarrays in drug development: regulatory perspective.- Complementary microarray technologies. EAN/ISBN : 9783764383343 Publisher(s): Birkhuser Discussed keywords: Entzündung, Microarray Format: ePub/PDF Author(s): Bosio, Andreas - Gerstmayer, Bernhard
