

Mp3 Ron Bucknam - Solo Subversion

Totally unique electric guitar solos that will stretch your mind, and if you play, leave you scratching your head. 15 MP3 Songs ELECTRONIC: Experimental, JAZZ: Weird Jazz Details: Music for people looking for new audio adventures. All the tunes were played on guitar (a big fat Gibson Jazz box) and put through sound processing equipment that I designed in order to play multiple parts in real time. All the music was played direct to DAT with no overdubs. The sound is so individual that I would be hard put to come up with a style label - give a listen and see what you think. Each composition was written to address a different emotional world: from nail-biting anxiety to serene pre-natal escapism. I love music that makes demands on my imagination and is a stretch to come up with visualizations for. I hope you do too. Enjoy the tunes, they were fun to create.
