

Mp3 Sonar Eclipse - Trance Fusion

[DOWNLOAD HERE](#)

A unique blend of Electro-Techno Funk rhythms and melodies. 10 MP3 Songs ELECTRONIC: Trance, ELECTRONIC: Funk Details: Check out my first album here: cdbaby.com/cd/sonareclipse My name is Dan Hopkins and I am writer and producer of Sonar Eclipse. I am excited to finally finish the second album Trance Fusion. It has taken me longer than I expected to finish it and I hope you will enjoy it. I chose the name Trance Fusion for the album because of the meanings behind the play on words. The basic concept of the music in this album (which stem somewhat from my first album Trance Cryption) is Trance, music that can be enjoyed in the forefront or in the background. The second theme of the album is in the word Fusion, which is to say a union as well as the music style of fusion that is flirted with through the different tracks. Put the words together and you get the play on words with transfusion, which mostly brings to mind a movement of the blood. This music will get your blood movin! The first album had a lot of different themes in it, and while this album keeps the variety alive, at the same time I have picked more of a reoccurring theme, one of an electro-techno funk theme. Give the tracks a spin and let it groove!
