Reggae mix with r&b blend 16 MP3 Songs URBAN/R&B: Soul, WORLD: Reggae Details: Welcome Friends to Sybelles Reggae Tracks! Its my pleasure to have you visit as I do hope you will enjoy listening awhile, With so many request from many of my fans, I wrote this album as a promotional album, to test my skills as an singer/songwriter, and to further promote myself as an Entertainer , as I pounded the pavements so much ,or I was sending out so many free cds to Djs or Record Producers or any one who would listen as I financed all costs of cd duplication on my own, I soon realized that I was more contented and happy to have the one on one relationship I did have with my audience , I never did believe that the buzz would be so much, My other albums try to captivate different other styles of music, I was so excited to embark this new challenge because as a writer I wanted to write about events that I have encountered at one time in my life or another, in a style of music that was not to familiar to me, and I felt that many of my fans would identify with much of the lyrics and would make one of these songs their own, I have had the pleasure to enjoy being an Indie Artiste, as I was once a singer who was only interested in being signed to a Record Label, but I grew to realize that I was happier being in control of my own signature style, and my fans would appreciate the fact that I did not have to sound commercial to have their support, I do appreciate your constant support and your views may be as to what you would like to hear and what you do feel about my songs ,your revues are so important to me as I will always return your email if this is what you wish of me, A special thankyou to all beat masters, music makers and any one who helped me in the smallest way to bring this Promotional Album to life..... Always remember that, Positive thinkers always produce positive results! Lets talk more later ok,
