

Biology Of Rhodococcus

[DOWNLOAD HERE](#)

Volker G rtler and Robert J. Seviour: Systematics of Members of the Genus Rhodococcus; Iain C. Sutcliffe, Alistair K. Brown and Lynn G. Dover: The rhodococcal cell envelope: composition, organisation and biosynthesis; Michael J Larkin, Leonid A Kulakov, Christopher C R Allen: Genomes and Plasmids in Rhodococcus; Hector M. Alvarez: Central metabolism of species of the genus Rhodococcus; Carla C.C.R. de Carvalho: Adaptation of Rhodococcus to organic solvents; Katherine C. Yam, Robert van der Geize, Lindsay D. Eltis: Catabolism of aromatic compounds and steroids by Rhodococcus; Ludmila Martnkov et al.: Catabolism of Nitriles in Rhodococcus; Ting Ma: The Desulfurization pathway in Rhodococcus; Maria S. Kuyukina, Irena B. Ivshina: Application of Rhodococcus in Bioremediation of Contaminated Environments; Hector M. Alvarez, Alexander Steinbchel: Physiology, biochemistry and molecular biology of triacylglycerol accumulation by Rhodococcus; Maria S. Kuyukina, Irena B. Ivshina: Rhodococcus Biosurfactants: Biosynthesis, Properties and Potential Applications; Elisabeth Stes, Marcelle Holsters, and Danny Vereecke: Phytopathogenic strategies of Rhodococcus fascians; Jose A. Vzquez-Boland et al.: Rhodococcus equi and its pathogenic mechanisms. EAN/ISBN : 9783642129377 Publisher(s): Springer, Berlin Discussed keywords: Bakterien, Mikrobiologie Format: ePub/PDF Author(s): Alvarez, Hctor
