Are You Getting The Conversion That Your Product Needs To Succeed? Is your website converting a respectable amount of visitors into sales? Are you making all of the money that you would like to make from your product online? Are you maximizing the conversion that you could be getting from your website? I know that these questions may be difficult to answer but this letter is going to clear up how you can convert more visitors into cash paying customers with no additional traffic... If the headline above intrigued you just a little bit then I know a couple of important things about you... 1) You want to make the maximum amount of cash from the existing traffic that is hitting your website but are possibly lost as to how to make that happen. 2) You may have been exposed to tons of tools, ebooks and reports on how to convert more visitors that just haven't delivered on the promises that they've made. The good news is that you are going to get a real "cure" to your conversion woes in the next 3 minutes. I am going to share with you the truth about problems that thousands of website owners are having with conversion and also provide the remedy to that problem. Before we get to

that, we need to go over something that very few website owners know about but has extreme effects on your response... Internet Customers Are Getting Smart, Ignoring Sales Messages & Becoming "Immune" To Ads Altogether! Many internet business owners have started seeing dramatic decreases in the response of their sales pages. A page that once pulled a 3-5 response consistently is lucky to get a 1/2 of a percent response now because of the growing awareness of ads online. While the net was once the "free information" Mecca of the world, it is now shifting toward a highly commercial model and savvy Internet users are becoming more aware of this. This has been devastating to many business owners online and many have "bit the big one" and totally closed their doors because their sites just aren't profitable anymore. Some marketers have scrambled and managed to keep their response high enough to be profitable but they are in the rare minority. And what is even worse about this is... Many Online Business Owners Are Spending All Their Time On The Latest Conversion "Fads" Just To Keep Their Site From Going Under... There are tons of new "tricks" and "fad" conversion tools that come out on an almost weekly basis in the Internet Marketing market. Sometimes, it's even several times a week! Many webmasters are scrambling to grab as many of these tools as they can at extremely high expense just to try and utilize them before they are no longer effective! This leaves them trying to not only keep their site conversion profitable but also to try and recoup the costs of these tools that they are buying. It's very hard for many to pull it off. Most of these tools do "Sly" things that visitors catch onto within weeks and that don't work more than a month or two. Some also get your site banned with search engines which may shut your business down for good depending on where you are getting your traffic from. So what is a person like you or I to do to combat this? Convert More Visitors Via Time Tested "Negotiation" Tactics That Suck In More Customers With No Additional Traffic!
