

Iutam Symposium On Advances In Micro- And Nanofluidics

[DOWNLOAD HERE](#)

1;Preface;6 2;Contents;7 3;List of Contributors;9 4;Part I Plenary Lectures;12 4.1;Nonlinear Electrokinetic Flow: Theory, Experiment, and Potential Applications;13 4.1.1;Introduction;13 4.1.2;Concentration Polarization (CP) and Over-Limiting Current;15 4.1.3;Nonlinear Electrokinetic Flow Near Perm-Selective Nanochannels;18 4.1.4;Outlook;24 4.1.5;Acknowledgement;25 4.1.6;References;25 4.2;Fluid Particle Models for the Simulation of Microfluids;28 4.2.1;Introduction;28 4.2.2;Dissipative Particle Dynamics;30 4.2.3;Smoothed Dissipative Particle Dynamics;31 4.2.4;Microstructured Fluids Modelling;33 4.2.4.1;Colloidal Particle;33 4.2.4.2;Polymer Molecule;34 4.2.5;Simulations;35 4.2.5.1;Colloidal Particle in Suspension;35 4.2.5.2;Polymer Molecule in Suspension;37 4.2.6;Conclusions;39 4.2.7;References;40 5;Part II Micro-channel Flows;41 5.1;Semi-analytical Solution of the Density Profile for a Gas Close to a Solid Wall;42 5.1.1;Introduction;42 5.1.2;MD Derivation of Equation of State;44 5.1.2.1;Internal Force;44 5.1.2.2;Pressure;45 5.1.2.3;MD Calculation Method;46 5.1.2.4;Equation of State Results;47 5.1.3;Analytical Derivation of Equilibrium State;49 5.1.3.1;Method to Calculate the Equilibrium Density;49 5.1.3.2;Simplifications at the Wall;50 5.1.3.3;Numerical Aspects;50 5.1.3.4;Equilibrium Results;51 5.1.4;Summary;54 5.1.5;Acknowledgment;56 5.1.6;References;56 5.2;Comprehensive Analysis of Dewetting Profiles to Quantify Hydrodynamic Slip;58 5.2.1;Introduction;58 5.2.1.1;Slippage at Solid/Liquid Interfaces;58 5.2.1.2;Dewetting Dynamics of Polymer Films;59 5.2.2;Experimental Section;60 5.2.2.1;Our System;60 5.2.2.2;Hole Growth Dynamics;60 5.2.2.3;Rim Shapes;62 5.2.3;Theoretical Models and Data Analysis ;62 5.2.3.1;Lubrication Model;62 5.2.3.2;Stokes Model;65 5.2.3.3;Method to Extract Slip Length and Capillary Number;66 5.2.3.4;Experimental Tests;67 5.2.4;Results and Discussion;68 5.2.5;Conclusion;70 5.2.6;Acknowledgments;71 5.2.7;References;71 5.3;Variation of Transport Properties Along Nanochannels: A Study by Non-equilibrium Molecular Dynamics;73 5.3.1;Introduction;73 5.3.2;Description of the Simulation System;74 5.3.3;Computational Details;75 5.3.4;Results and Discussion;76 5.3.5;Conclusions;83 5.3.6;Acknowledgement;84 5.3.7;References;84 5.4;Estimation of the Poiseuille Number in Gas Flows Through Rectangular Nano- and Micro-channels in

the Whole Range of the Knudsen Number;85 5.4.1;Introduction;85 5.4.2;Flow Configuration;86
5.4.3;Formulation;87 5.4.4;Results and Discussion;90 5.4.5;Concluding Remarks;92 5.4.6;References;92
5.5;Moving Contact Line with Balanced Stress Singularities;93 5.5.1;Introduction;93 5.5.2;Smoothed,
Finite-Width Interface Model for Moving Contact Line;94 5.5.3;Discussion;97 5.5.4;Conclusion;99
5.5.5;References;99 6;Part III Complex Fluids;101 6.1;Clarification and Control of Micro Plasma Flow with
Wall Interaction;102 6.1.1;Introduction;102 6.1.1.1;Electric Propulsion;102 6.1.1.2;Hall-effect
Accelerator;103 6.1.1.3;Phenomena in Micro Plasma Flow;104 6.1.2;Numerical Analysis;105
6.1.2.1;Fundamental Equations;105 6.1.2.2;Boundary Conditions;107 6.1.3;Results and Discussion;107
6.1.3.1;Plasma Instability;107 6.1.3.2;Average Length of Ionization-Zone;108 6.1.3.3;Parametric
Estimations of Instability and Performances;109 6.1.3.4;Spatiotemporal Variations of Plasma Parameters
and Electromagnetic Field;112 6.1.3.5;Influence of Fixed Parameters upon Calculations;114 6.1.3.6;New
Concept for the Higher Performance;115 6.1.4;Conclusions;117 6.1.5;Acknowledgments;117
6.1.6;References;117 6.2;Electrochemical Control of the Surface Energy of Conjugated Polymers for
Guiding Samples in Microfluidic Systems;118 6.2.1;Introduction;118 6.2.2;pi-Conjugated Polymers;119
6.2.3;Electrochemical Doping;120 6.2.3.1;Chemical Process;121 6.2.3.2;Chemical Property Changes;121
6.2.3.3;Device Structure;122 6.2.4;Wettability;122 6.2.4.1; EAN/ISBN : 9789048126262 Publisher(s):
Springer Netherlands Format: ePub/PDF
