Electro chill out grooves reminiscent of the Caf Del Mar series.' Brag Magazine 22/03/04 'Elation stand alone as a beacon of originality and sharp musicality. This diverse five-piece not only traverse musical genres with ease, they combine their multitude of backgrounds to create something unique. Solar Playground melds everything sensuous: from chilled out house, to deep dub beats, to some funky drum and bass.' In The Mix.com.au 'Let The Wind Blow' is an airy acoustic guitar-led track underpinned with faint sampled loops and topped with

Humphries' vocals - which certainly recall Dido's stylings and inflections. There's some nice Hammond in there too and some clever beat programming towards the end - this is an extremely polished first offering from Elation, and it will be interesting to see what directions they take on their upcoming EP.'
