Music for Massage, Meditation and pure bliss. 8 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Soundscapes Details: Tajalli Born William Wichman, of an German father and Mindanaoan mother, he underwent a life-changing experience in 1973 when he met Master Kirpal Singh. His deep spiritual change was reflected in his music, which began as golden oldies tunes, but evolved into new age rhythms. Tajalli played in his early days with artists such as Santana, Gordon Lightfoot, Paul Horn and Steven Halpern. Taj kept close ties with his roots in the tropical islands of the southern Philippines. He dreamed of someday returning to his islands, though his music kept him quite busy locally and in his many studio recordings in L.A., including film. He acted and performed the character Red Bear in the independent movie "Buffalo Hearts". Throughout most of his adult life, Taj called the San Francisco Bay Area home. His blend of eclectic music and positive spirit brought cheer to the thousands whom he touched. Tajalli and Suzanne have been very close friends since 1983 and have been recording together since. Their album BRILLIANCE was released in 1984, with the critically acclaimed track: Crystal Flight, which was featured in several Visionary Videos. TANTRA ZONE is the follow up release of their collaborations. Chuck Plaisance and Paradiso have been participating on the track CRY OF THE EARTH.
