Alternately brisk and restful, steeped in ancient traditions and informed by a wide range of modern musical genres, this is a fresh, new style of chamber music. Viola da gamba and medieval fiddle blend organically with electric guitar and synthesizer. 9 MP3 Songs NEW AGE: Contemporary Instrumental, CLASSICAL: Contemporary Details: Vajda plays all the instruments and writes all the tunes on this instrumental disc, and it is really compelling. His primary instrument is the viola da gamba, which looks like a cello, plays like a cello but its a viola. Regardless of my ignorance on that topic, I can still appreciate the beauty of this music. Soothing, intriguing and different enough to make it stand out. - Toledo City Paper The musical style, as well as the instrumentation, of Bootstrap Physics grew out of years of playing viola da gamba and medieval fiddle in early music ensembles while also playing electric guitar in a band that played rock and blues covers, and specialized in free-form improvisation. The style was also influenced by Eastern European folk music, as well as the music of Steve Reich and other contemporary composers. Tracks from bootstrap physics have received frequent airplay on the nationally syndicated radio program Echoes, and have been used as bumper music on Minnesota Public Radio.
