

Mp3 William Verkler - Sierra Mountain Storms Se008

[DOWNLOAD HERE](#)

Storms Recorded Near Yosemite, Ca in the Sierra Mountains at 3000 ft elevation, during the Storms of 2009. Rain, Hail, Thunder, Sleet, Wind. 19 MP3 Songs in this album (74:41) ! Related styles: NEW AGE: Ambient, NEW AGE: Nature People who are interested in Zeus should consider this download. Details: Sound Effects from Mother Nature at her finest, and the sounds surrounding us that we live with everyday. Track 13 is great. It has everything, Lots of Thunder, Rain, Hail, Wind and is over 11 minutes long. Track 14 is as long and Dynamic but has less Thunder. Track 2 the Helicopter is probably searching for POT Farms in the Sierra Mountains that include Yosemite and a lot of Square miles of National Forest. The sounds of evening Crickets, Cars and Trucks passing by on Scenic HWY 49 South. The "Gold" Highway. Birds Chirping, Dogs barking, even Snow can be Noisy when it comes at you doing 50 MPH and is a little wet. The gutters draining the Rain Water from the roof tops has a great additional sound flavor along with the sounds of wind gusts. An occasional blast of Thunder after a bright flash of Lightning, that is too close for comfort makes for some exciting evenings in the Sierra Mountains. When the house stops shaking, one's senses are altered for a period of time until the next one that is even worse lights up every room in the house, kills the power, has everyone looking for a flashlight. Enjoy...
