Urban/R&B 13 MP3 Songs URBAN/R&B: Funk, URBAN/R&B: Soul Show all album songs: Digiology

Songs Details: This CD has been a long time coming and Im glad the day has arrived. Of course I wish this day would have been twenty years earlier, but would I have been as ready as I am now, I doubt it. This business is brutal, the ups and downs, the vices thankfully Ive pulled through it all and still believe in the music. The approach I took with producing the cd is nothing new Im sure, new to me of course. My forte in this business has been for many years as a performer and for the last 10 years Ive taken on the helm as producer and studio production within the recording environment and it looks as if I might have a new home here. So to elevate to that next level please pick this cd as your next. The music has different styles and moods but definitely an originality of my own, such as my life in this business, Enjoy. CD design by SPE Special thanks to all musician on the project, Keith Weddington-guitar, Ron Ellison-vocals, Riccardo Bray-guitar, keyboards, Dan Perez-saxophone, Moyo-synth, Gary Gibbs-bass, Walter Dawkins (14 15)-programming and soprano saxophone Very special thanks to my wife Carol, thanks for being in my corner baby. Without you, where Would I be. A life time of study, a couple years in prep. Digiology fits this cd to a tee, taken in consideration of the times and technology. It hits right where Im at with the music, hey I go back some ways and I try to reach back some what because I feel thats the time when Funk and R&B was at it best, you dont hear to much of those styles anymore. So thats where my music at, I still cant get away from the contemporary though. But thats what makes it hip or cool, what is cool anyway, Enjoy.
