

Natural Compounds As Drugs

[DOWNLOAD HERE](#)

1;Contents;6 2;Foreword;8 3;Glossary;12 4;Mother Nature s gifts to diseases of man: the impact of natural products on anti-infective, anticholestemics and anticancer drug discovery;14 4.1;Abstract;15 4.2;1 Introduction to natural products;15 4.3;2 Anti-infectives (antibacterials, antifungals and antiparasitics);17 4.4;3 Anticholestemics;32 4.5;4 Anticancer;33 4.6;5 Conclusion;42 4.7;References;44 5;Drug discovery and development with plant- derived compounds;57 5.1;Abstract;58 5.2;1 Introduction;58 5.3;2 The discovery process of biologically active plant products;62 5.4;3 Anticancer agents;64 5.5;4 Antimalarial agents;81 5.6;5 Antiviral agents;86 5.7;6 Inflammation, nociception, immune system;93 5.8;7 Cardiovascular and metabolic disorders;102 5.9;8 Alzheimer s disease;108 5.10;9 Industrial scale production of plant derived drugs supply and conservation issues;113 5.11;10 Plant-derived drug discovery after the convention on biological diversity;116 5.12;11 Conclusions;118 5.13;References;118 6;Evolutionary mechanisms underlying secondary metabolite diversity;130 6.1;Abstract;131 6.2;1 Introduction;131 6.3;2 Evolution of secondary metabolite biosynthesis enzymes from primary metabolism;132 6.4;3 Factors influencing the distribution of biosynthetic enzymes among species;135 6.5;4 Mechanisms leading to the diversification of enzymes and their products;139 6.6;5 Hypotheses about functional roles of secondary metabolites;143 6.7;6 Role of selection and adaptation on the evolution of secondary metabolites;145 6.8;References;147 7;Biodiversity, chemical diversity and drug discovery;151 7.1;Abstract;152 7.2;1 Introduction;152 7.3;2 Microbial sources;153 7.4;3 Microbial diversity;158 7.5;4 Role of terrestrial and marine habitats;161 7.6;5 Microbial diversity and dereplication of strains;163 7.7;6 Exploiting the hidden microbial diversity;164 7.8;7 High throughput isolation approaches;168 7.9;8 Genomics-guided natural products discovery;169 7.10;9 Chemical diversity;171 7.11;10 Drug discovery;176 7.12;References;177 8;High impact technologies for natural products screening;184 8.1;Abstract;185 8.2;1 Introduction;185 8.3;2 Construction and characterization of natural products libraries;188 8.4;3 Screening of natural products libraries;204 8.5;4 Conclusion;211 8.6;References;212 9;Virtual screening for the discovery of bioactive natural products;219 9.1;Abstract;220 9.2;1 Introduction;220 9.3;2 Status of NPs;221 9.4;3 Holistic versus molecular

approaches in drug discovery from nature;222 9.5;4 Computational approaches for the discovery of lead structures from nature;224 9.6;5 Pharmacophore concept in NP research;227 9.7;6 Structure-based pharmacophore model;228 9.8;7 Ligand-based pharmacophore model;232 9.9;8 Discriminant analysis;235 9.10;9 Databases;236 9.11;10 Integrated strategies for the discovery of bioactive NPs;238 9.12;11 Conclusion;247 9.13;References;251 10;Strain improvement for production of pharmaceuticals and other microbial metabolites by fermentation;257 10.1;Abstract;258 10.2;1 Introduction;258 10.3;2 Mutagenesis;259 10.4;3 Deciphering biosynthetic pathways;266 10.5;4 Recombination;266 10.6;5 Genetic engineering;271 10.7;6 New strategies;273 10.8;Closing comments;279 10.9;References;280 11;Nutritional and engineering aspects of microbial process development;295 11.1;Abstract;296 11.2;1 Introduction;296 11.3;2 Engineering aspects;314 11.4;3 Summary;326 11.5;References;326 12;Natural products from plant cell cultures;332 12.1;Abstract;333 12.2;1 Introduction;333 12.3;2 Techniques of plant cell culture;336 12.4;3 Natural products produced from plant cell culture;342 12.5;4 Future directions;363 12.6;References;364 EAN/ISBN : 9783764381172 Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Pharmakologie Format: ePub/PDF Author(s): Petersen, Frank - Amstutz, Rene
