Melodic, piano based rock with personal yet universal lyrical appeal. 11 MP3 Songs POP: Piano, JAZZ: Jazz Vocals Details: Artist statement "Making a living from music is a difficult yet satisfying thing to do. There is a constant push and pull between art and business. Writing and recording projects take longer as an independent artist, but the freedom to choose my own direction is vital. It seems the time-honoured craft of song-writing is becoming lost in all the hype and so a great deal of my inspiration comes from those who keep this tradition alive."
