Hair metal with glow sticks. 16 MP3 Songs in this album (74:23) ! Related styles: ELECTRONIC: Electronica, POP: with Electronic Production People who are interested in BT Underworld Imogen Heap should consider this download. Details: Do you hate electronic music? I understand. It's easy to get bored or annoyed with 45 minutes of boom-chica-boom. So I try to make music that's so spontaneous, it's almost surreal, and so catchy, it's almost cheesy. Almost. I started making music when I was 14. Despite years of tinkering, I had trouble making anything decent. Finally, I was introduced to Garageband. Composing on a computer for the first time, not to mention switching to a Mac, took some getting used to. My tastes began to change as I tried to match the sophistication and originality of the musicians I admired, but I was often disappointed with my material. I eventually got over all this. I take pride in my work and enjoy all the steps of the creative process. Whatever the future may hold, I look forward to writing fine songs and bringing it to the world. Taking four years to complete, a lot went into this album. I hope it sounds awesome and offers plenty for dancing, thinking, and maybe singing too. Enjoy.
