Soft Rock, 70's pop 11 MP3 Songs POP: 70's Pop, EASY LISTENING: Soft Rock Details: Music has always been my salvation and passion as far back as I can remember. Being the 5th of 7 children with a large age gap in between my siblings, I needed an outlet. Fortunately my Dad had a large record dept in his shop in NYC and my oldest sister would bring home pretty much the whole Top 50 singles. Growing up in Brooklyn in the early 70's exposed me to all the great Singer Songwriters and Artists of our time. That era had music from every genre possible on the radio. Losing my Mom to cancer at age 3 left me somewhat scarred and I turned to the Music of Bob Dylan, The Beatles, CSNY, Jim Croce and Stevie Wonder for their healing powers. I soon needed to document my own feelings and at age 12 taught myself guitar and piano and worked out note what was on record. Hardly a day would go by without playing some guitar during a break in High School. Though I've written scores of songs and have performed through the NYC area, this is my first cd. The songs are a culmination from youth to adult still searching. They are for the most part in first person with words and melody of inspiration and healing.
