"...An artist to look for in the future as they're gaining momentum every day." -- XM RADIO "EDITOR'S PICK. Fast songs, the occasional ballad, and good riffs, but mostly light-hearted tunes to happily bang our heads to as we go about our sunny day." -- Download.com "...This band reminds me of why I started liking music in the first place... kick ass, melodic rock n roll... killer music... this band simply rocks and is very worthy of your rock starved ears. Great stuff!" -- Popbang Radio "...Almost any one of these songs could be a radio hit... Songs like 'A Little Love,' 'Perfect Day,' and 'Too Much About Me' would fit nicely sandwiched between artists like Sister Hazel and Foo Fighters... The production here is strong enough that listeners would probably not even know these guys were independent." -- Indie-Music.com "...These guys have created their own genre... a combination of Foo Fighters and Jet... every song had something I liked." -- Unsigned and Independent Music Reviews "...Fighter Pilot has something that just sticks, keeps boomeranging back at you. Ive listened to this album five times in the last few weeks and, well, it just works." -- Not Lane Recordings "...The music of Fighter Pilot smokes with emotion, hooks and energy... A blistering hot release with chugging melodies and tough vocals... Features some very cool guitar sounds and nice soloing that is missing from so much of today's rock... Straight-on, fun blast of rock and roll." -- Whitsbrain.com "...Another power pop trio that plays lots of great songs... These songs are not only intended to have additional heft -- they actually have it... something impressive. A most enjoyable endeavor." -- Aiding and Abetting Tired of the current music scene?
