a ten piece band made up of very well known Los Angeles musicians performing original jazz, funk, rock, fusion, experimental, eclectic original compositions. 10 MP3 Songs JAZZ: Smooth Jazz, JAZZ: Free Jazz Details: Musicians love to play in this band and audiences are always very pleased with our performances. Overheard comments include descriptions like "very interesting, a wonderful sound" and similar comments. The ten piece band is made up of very well known Los Angeles musicians who rehearsed every Monday morning for years just because they love playing this music. In fact when I (Jim Morris) grew discouraged, many members practically insisted I keep the band going. This speaks volumes about the quality of the music considering their busy schedules and not getting paid to rehearse in our band. The band doesn't easily fit into a single category. One agent said it sounded to him like Tower of Power but that was because he heard us do something like that. The comments most often heard and written about are things like "Fresh and new" "Not the same old thing" "Sometimes powerful. Sometimes lush and gorgeous" Judge for yourself. Jim Morris
