Out Out is a pioneering Industrial/Electronic/Rock band, mentored by Tackhead and often compared to earlier NIN, mid-period Ministry and sometimes Skinny Puppy. Originally signed to Tackhead member Skip McDonald's label Axis, then later to Metropolis Records. Now running their own label, Radio Valkyrie Records, Out Out is celebrating a new era for independent music. We strongly encourage people to legally download and purchase independent releases, and to spread the word about their favorite artists. This makes it possible for independent labels and artists to continue bringing original and innovative music to the world.
