'music is what keeps me sane.. working on a yacht 24/7.. my expression, my outlet, my love!! my guitar even sleeps in the bed with me most of the time!' Prita. 'Prita has shown she not only writes excellent lyrics but she can play excellent music. Her voice is soothing and at the same time spectacular. The way she sings is just wonderful. This combination brings very warm and spiritual feeling in her music which makes it very special. For every song you can hear and feel her message and emotion. I play this CD in the morning to get me started and after work to bring me down to relax. It can be played anywhere and people have always complimented whenever I play it. Once again, great lyrics, great singing and great music. They are all brilliant songs.'

Lee West - musician, traditional dancer and actor. 'I was so honored to be involved with Prita's first release. She has some of the most honest and touching songs that I've heard... her voice is one of pure natural born talent and beauty. She has an ear for vocal harmony that truly inspires me and other that have had the pleasure of witnessing. When you start with great songs and a uniquely identifiable voice, producing a CD is a joyful and effortless experience. The Prita EP was no exception.'
