I've not heard a better example of this highly difficult genre. I love hearing two distinct styles overlapping, complimenting each other's energy. This one's fresh. (- AcidPlanet listener) 8 MP3 Songs ELECTRONIC: Techno, ELECTRONIC: Breakbeat/Breaks Details: Today, many pop and traditional music fans quickly overlook the creativity and artistry of electronic music because it doesn't focus on overly simplistic, 3 minute, pop driven rhythms. Instead, the new generation of electronic music is left to the true music fans, who desire a mastery in the creation of intermixing some traditional elements with a vast array of spontaneous ideas. SIM_01 is the new artist bridging the void between the pop fans and the new generation. SIM_01 brings to electronica the energy and human aspect of the music that is often forgotten. A concentrated focus not to create music that is just a collection of dance beats and rhythms but music that combines the creativity and foresight of music influences like Moby and Beck; artists who have ventured into the forefront of presenting unpredictable song structures with the attitude of "breaking all the rules."
