pop/alternative rock that reaches listeners with it's authentic message and energy. 13 MP3 Songs POP: Power Pop, ROCK: 90's Rock Details: It was a cold December winter night in California (or a Fall night in Minnesota) in 1993, when a young singer/songwriter Andy Zamenes first decided to join forces with a few hungry musicians in a garage somewhere in Redwood City (What do you mean, where's Redwood City?). It was this meeting that spawned the power pop rock experience that is Tinman. Performing primarily in Northern California- extensively in San Francisco- and slowly covering the entire Golden State and ....the WORLD..., the band is picking up fans, affectionately referred to as Tinmaniacs, where ever it goes. Want to know where else you can find them on the web? Glad you asked! You can visit their web site at tinmania(link's on this page) and listen/download selected tracks on Garageband.com. Any future plans? Well, although Andy Zamenes a.k.a. Andy Z is doing almost exclusively music for children (also available on CD Baby), the Tin-wagon will roll again. In fact there are new tin-tunes just WAITING to be recorded and released. So be sure to hop on when it rolls into your town. It's one heckuva ride!
