Electronic/Dance/Techno 13 MP3 Songs ELECTRONIC: Dance, NEW AGE: Healing Details: Wess Mepron, is the culmination of one mans dream for all genre chaos music with healing properties. Wes Hopper is 33 years old has been playing piano since he was three. Started with classical music by ear. Had a few lessons for reading music as a teen. Went from classical to Celtic Dance Rock. Got interested in chaos music the early 90's. Began writing his own music in 1993. After hearing Enyas healing sounds got interested in modifying the ideas. And spent over ten years letting the music evolve to what is on the album today. The idea behind this album is to force the listener to ignore the bass section. If played at least three or four times daily by persons in poor health will have healing effect over a few weeks time, especially if listened to while sleeping. This music will talk to you if you listen to intensely. Please do not read into anything the music says, most of the messages are harmless and funny. Some are prayers and confessions to God. The last piece of music on the album is for a laugh ( the first keyboard). The only computer enhanced cut is (Enyaesk). All others were done by hand. Volume 2 will be out soon expect to go backwards and forwards in time and expect the unexpected. Comments are welcomed
