Progressive Trance / Progressive House / Electro 8 MP3 Songs ELECTRONIC: Trance, ELECTRONIC: Dance Details: After their first contact with Trance music back in 1993, Haldolium have made a constant evolution over the past few years. Starting on the forefront of the upcoming progressive psytrance movement they got famous for their very own style of kickin, phat, but minimal, straight german trance. But they always tried to explore also others forms of trance, deep mystic downbeat and ambient tunes, as well as more groovy and clubby styles. Also their new and 4th album crosses the stylistic boundaries. We find a range from sexy groovy sounds for clubs or the late and special moments of a party, beneath dark progressive psychedelic tunes for the dancefloors at night, as well as vocalised progressive house, electro and downbeat. All tracks are very dancefloor orientated, with high quality production and mastering, showing the matured skills and musical knowledge of the artists. Beneath playing this album on parties, it got also its homelisting qualities. Most of the tunes are very deep and smooth and can also be enjoyed in quiet moments..
