Original music, varied styles, performed on the windsynth. Incredible virtuosity in a whole new world of music. 12 MP3 Songs NEW AGE: Solo Instrumental, ELECTRONIC: Synthpop Show all album songs: At the End of the Day Songs Details: Wind Synthesis mates a wind-driven controller (Yamaha WX5), to a synthesizer designed to receive breath information (Yamaha VL70-m). With this pairing, changing air pressure can be assigned any desired dynamic(s); volume, intensity, color, growl, etc., to any voice. I can play like a tenor saxophonist or I can sound like a cello. I have a voice called Jimi Hendrix, and a 7-octave screamer called Sumo. I can drum with my tongue and sound the digeridoo. Circular breathing allows me to make continuous sound.. Wind synthesis begets an amazing array of new instrument possibilities, new sound variables, which open ever more possibilities for music to happen.
