

Pet-ct: Rare Findings And Diseases

[DOWNLOAD HERE](#)

From the contents: Part 1: FDG: Rare Diseases: Giant cell tumor (GCT).- Pulmonary amyloidosis.- Pneumoconiosis.- Pulmonary aspergillosis.- Pulmonary scar cancer.- HIV-related pneumonia.- Pulmonary sarcoidosis.- Varicella pneumonia.- Castleman disease.- Perivalvular abscess.- Hepatic abscess.- Pediatric hepatic hilar abscess.- Basal-cell carcinoma.- Graves-Basedow disease.- Erysipelas.- Initial stage discitis.- Erdheim-Chester disease.- Necrotizing fasciitis.- Vaquez disease.- Peritoneal catheter infection .- Implantable cardiac device infection .- Thoracic aortic graft infection.- Rheumatoid arthritis.- Idiopathic mediastinal fibrosis.- Spinal disc herniation.- Mesenteritis.- Osteomyelitis of the foot.- Peritoneal mesothelioma.- Lymphoma of the brain.- Osteomyelitis of the sternum.- Paget s disease.- Post surgical bone infection.- Pigmented villonodular synovitis.- Vascular graft infection.- Atrial sarcoma.- Avascular necrosis of the bone.- Malignant otitis.- Bone sarcoidosis.- Polidermatomyositis.- RS3PE.- Tuberculosis.- Sacroiliitis.- Pulmonary MALT lymphoma.- Fibrosarcoma.- Large soft tissue sarcoma.- Stump appendicitis.- Bowel transplantation with EBV infection.- Von Recklinghausen disease.- Wilms tumor.- Microcystic tumor of the pancreas.- Epilepsy.- Spindle cell carcinoma of the prostate.- Part 2: 11C-Choline: Rare Diseases: Hepatocellular carcinoma.- Multiple myeloma.- Paget s disease.- Sarcoidosis.- Renal cell carcinoma.- Part 3: 11C- Methionine: Rare Diseases: Adenocarcinoma of the lung.- Brain hemorrhage.- Encephalitis.- Primary hyperparathyroidism.- Lymphoma of the brain.- Soft tissue sarcoma.- Part 4: 68Ga-Somatostatine Analogs: Rare Diseases: Cystic serous adenoma of the pancreas.- Chronic pancreatitis.- Neuroendocrine tumor of the prostate.- Part 5: FDG: Rare Findings: Portal thrombosis.- Acute pulmonary alveolitis.- Inflammatory abdominal aortic aneurysm.- Cavernous hemangioma.- Liver hemangioma.- Renal angiomyolipoma.- Kidney stone.- Cholecystitis.- Cholesterolosis of the gallbladder.- Metformin and colitis.- Corpus luteum.- Pulmonary heart.- Infection of central venous catheter.- Double ureter.- Interstitial pulmonary edema.- Septic pulmonary embolism.- Subcutaneous emphysema.- Inguinal hernia.- Frontal hematoma.- Chronic atrial fibrillation.- Large uterine fibromas.- Respiratory failure.- Recent bone fracture.- Bone infarct.- Pulmonary infarction.- Aortic graft infection.- Hip prosthesis infection.- Intraductal papillary mucinous neoplasm (IPMN).- Aortic graft

leakage.- Mastoiditis.- Pulmonary microembolism.- Avascular necrosis of the head of the humerus.-
Non-specific interstitial pneumonia (NSIP).- Muscular uptake.- Muscular lipoma.- Constrictive pericarditis.-
Benign asbestos pleural disease.- Pleuropericarditis in inflammatory bowel disease (IBD).- Bacterial
pneumonia.- Post-radiotherapy changes.- Xanthogranulomatous.- Lymphadenitis.- Knee prosthesis:
physiological biodistribution.- Nodular radiation pneumonitis.- Spina bifida.- Spondylolisthesis.- Rib
fracture.- Inferior vena caval thrombosis.- Duodenal ulcer.- Shingles.- Part 6: 11C-Choline: Rare Findings:
Vertebral collapse.- Interstitial pulmonary edema.- Bullous emphysema and pulmonary fibrosis.- Inguinal
hernia.- Rib fractures.- Implantable cardiac device infection.- Lymphoma.- Trauma.- Part 7:
68Ga-Somatostatine Analogs: Rare Findings: Multiple myeloma. EAN/ISBN : 9783642246999
Publisher(s): Springer, Berlin Discussed keywords: Positronen-Emissions-Tomographie (PET) Format:
ePub/PDF Author(s): Nanni, Cristina - Fanti, Stefano
