

From Here To Sustainability: Politics In The Real World - , Ian Christie

For a large proportion of the electorate, national politics misses the real issues. As a result, membership of campaigning organizations has soared whilst party numbers have declined. This work distils the principles and priorities of many of the leading voluntary groups into a strong and coherent programme of political aims and actions. The problem can be measured as a sustainability gap - between official policies and achievements and actual democratic participation, environmental restoration and the eradication of poverty. With examples and short case studies, the book translates the gap into practical and realistic recommendations for progress.
