Green Rape: Poetry for the Environment is an anthology of poems written in strong support of environmental literacy. Each poem is the poet's cry of protest against the rape of natural and built environments. The anthology examines a wide range of issues including the clash of global capitalism with environmental activism. It takes a close look at the major themes in international discourse on environmental degradation, climate change, renewable energy sources, global warming, Gene technology, biodiversity and more. The poet dispels a number of myths, notably the existence of an inexhaustible bank of natural resources at the disposal of Man. He attempts to provide a solution to the abusive and unbalanced utilization of scarce natural resources. In a unique way, the poems contribute to the fostering of environmental awareness that would contribute to the sustainable management of natural resources. The poet invites us to look beyond the doomsday rhetoric about the state of the environment and to commit more of our resources where they will do the most good to lifting the world's population out of poverty. The significance of this anthology to environmental education resides in its contribution to the debate on global sustainable development, especially efforts to protect the environment and eradicate poverty.
