Originally from Cambridge, Uk, Airbiscuit were founded in late 2001 with a simple mission - to create quality music with widespread appeal, irrespective of genre. Recognising that electronic music had potential to reach people beyond the trip the light fantastic world and of all musical tastes, they spent all of last year producing their double-album, Caldo-Freddo. Two CDs of matchless, seductive, and intelligently produced music: CALDO, the hot stuff, uptempo trip the light fantastic in a variety of styles; FREDDO, the chilled stuff, electronic based tracks of lounge, AOR, Jazz, pop and chillout persuasions. From the snapping guitar riff of FIBRE to the dreamy soundscapes of SUBLIME; the lush synths and vocals of LATELY to the 60s retro vibe of GOT CARTER and the peerless jazz influenced WONDEROUS- just pick your mood, and go with it. AND THAT'S EXACTLY WHAT THEY'VE ACHIEVED HERE' Pathaan, DJ Mag 'A BEAUTIFULLY PRODUCED GEM WITH THE SWEETEST VOCAL.'
