Singer Songwriter Anthony James' songs are stories about the basic meaning of life and what is really important. 11 MP3 Songs COUNTRY: Country Pop, COUNTRY: Country Rock Details: Anthony James is a retired science teacher who always had a desire to write and sing his own songs. Now that he no longer has the duties of a public school teacher he has more time to devote to his music. The song A PhD in Being Me probably sums up his philosophy of life pretty well. No one can ever put themselves in someone else's shoes and no educational system really can provide what is best for each and every student who is constantly being measured according to a common standard.. The Anthony James Bands latest album, Through the Half Light, includes a few remixes of songs from their first album but most of the songs are new. Of special note are September Songs, When My Brown Eyed Baby Gets the Blues and Little Girl by bass player Chris Turcotte. Full of soul and emotion these songs remind us of those special transitions in life, the quiet dawns where contemplation replaces the over activity of modern culture and we revert back to the dimly lit room, by a fireplace.
