American music built from the ground up to the sky. Rolling, fingerstyle guitar grooves offer up songs for an all night drive. 9 MP3 Songs ROCK: Psychedelic, BLUES: Acoustic Blues Details: I'm a solo acoustic guitarist/songwriter from San Francisco, blending groove driven acoustic picking with 'real' songwriting to create raw, beautiful music. From the perspective of creating vast landscapes of sound, I let freeform-fingerstyle jams stretch out through a map of modern songwriting. Voice echos down timeless canyons, across windswept, ambient bluegrass-hills, and lands with the rest of the music at the ocean's doorstep. Smoke em if you got em, the production flows into the room with as much magic as I thought it could carry. The sound is both natural and universal, played as an invitation to open up and come along for the ride. This is my first cd, it's just the beginning, and I hope it takes you there. - Clay
