A seasoned jazz guitarist and multi-talented musician, playing several instruments on his CD, Dale has been playing guitar for thirty-one years and performing professionally for twenty-five years. The 2003 release of his CD "Just Say Hello!" was his debut into the world of children's music. "I did it for my own children to start," notes Dale, "then it just went wacky with gig after gig and now the CD!" With strong successes during his first several concerts for children, Dale was easily convinced to continue to play and record upbeat and silly music for the toddler and preschool set, all geared to inspire young children's imagination and creativity. His shows have been crowded, and his music is filled with energy, fun and cleverness. Dale's music incorporates different styles of music to engage young children - The tracks (Freeman originals and several traditional tunes) contain echoes of 60s bands like the Beatles, the Byrds, and the Beach Boys, as well as Celtic, latin, classical, and blues influences. There is even a polka!
