[DOWNLOAD HERE](#)

Lorraine's second release of bossa novas, Casio orchestras, lo-fi cha cha chas and the odd string quartet. Melodic songs with catchy choruses plus the latest from Lorraine's chimney sweep. 18 MP3 Songs POP: British Pop, EASY LISTENING: Easy Pop Details: Greatest Hits Volume Two is Lorraine Bowen's second album produced in 1998. She had already had a lot of success with Greatest Hits Volume One and her song Julie Christie had made an impact on lots of people including the producers of the film BETTER THAN CHOCOLATE. So Album Two was released with the same catchy no-nonsense style of song writing that the British are famous for! Easy listening themes and bossa nova lo-fi tunes all written in Lorraine's living room over three years in the East End of London. Matching Bikes tells of her passion for seeing couples in matching outfits out and about - showing off to the world that they are 'together'...Botanical Gardens is a story-song rather telling of an adventure to Kew Gardens where a passionate embrace becomes an analogy of the perils of human kind! On this CD the Crumble Song is deftly arranged with hammond sounds, trumpets and flutes and to finish the album she hired a string quartet for the very beautiful ballad, Kippers For Breakfast. Lorraine's songs will stay with you for life. They are tiny NUGGETS OF JOY in a world where mainstream pop bores and your Aunty Joyce has to sit on the spin dryer to get any excitement. ENJOY! People who are interested in Lily Allen should consider this download.
