Related styles: POP: Folky Pop, COUNTRY: Alt-Country People who are interested in James Taylor Suzanne Vega Joni Mitchell should consider this download. Details: This album was never released but was made as a demo album and then sold on gigs, with a few copies also being sold on consignment in the wonderful old Tower Records at London's Piccadilly Circus. The songs have all now been properly released on Rebecca's albums June Babies and Orange Roses, with some changes to the arrangements. The original version of Where are you going? features the whole band for example, and Mushroom Song is with guitar instead of with piano as on Orange Roses. Somerset features the wonderful saxophone playing of Chris Bowden, who didn't play on subsequent albums but did the string arrangements for June Babies. In spite of all the work that went into the subsequent albums, some people say they still prefer this one.
