Alter teams up with producer, Cadilakid for their debut album, Eleventy Billion Served. Throwing-out all conventional rules of hip hop, rhyme scheme and song presentation. Alter delivers a comprehensive album about his life, experiences and values from his surreal perspective. Cadilakids hard hitting and sinister sample-based production allows Alter to deliver raps how he likes them: Hard. It is difficult to believe that Alter One came up on traditional hip-hop when browsing through his vast catalogue of recordings that have never left the studio. Such an original rap style cannot be compared to any other in contemporary or golden age hip-hop. Nevertheless, Alter consistently covers the listener in a barrage of words that cannot be described best as rapping, but more effectively as ranting. Emotionally, Alter skillfully delves into a range of serious content to light-hearted humor, never sounding contrived or lacking mic presence. Alter One shares introspect in Anti-matter: My self, my girl, my crew, my friends, my family, my people, my city, my country, my planet, most of all, my music.
