Her passion and perspective touch those on the path between love and fear. Retrace these steps with her, and listen for the echoes of your own quest along the way. "Letting Go" was born in a small digital studio in her second bedroom. The recent years had brought much beauty, truth, pain, fear, scars, hope, and love into Angie's world, and all of these things needed an outlet. In the quiet small hours of the night, she sat by the light of the computer monitor and a few candles...hit "record" on the system...and simply opened up her soul and captured it on disc. She didn't edit what came out of mouth and her fingers, she didn't try to write for anyone but herself - she gave herself up to the purity and honesty of what was in the core of her being. She grew to love the songs that were in truth pieces of herself, and knew that her second album was written...and needed to be released. She also knew that to make this a reality, she needed someone who understood her perspective and passion, who possessed both the artistry and craftsmanship to breathe life into the recordings, and who had the dedication and patience to pursue the project to its conclusion. Enter Randy Brock in the triple role of drummer/percussionist/guitarist, producer, and mix engineer. His elegant, deceptively simple drum lines and incredible attention to nuance are showcased on every track of the new album.
