Carnuba is an energetic and diverse band from AZ. The only way I can truly describe this band is to say that they are pioneering a new class of music by not fitting into any distinct style. 12 MP3 Songs ROCK: Punk, ROCK: Folk Rock Details: Carnuba is an eclectic group of boys from the deep reaches of our solar system. Combined they have over three quarters of a millennium of musical background. Their style is as diverse as the backgrounds that they come from, ranging from earthly folk to Saturn like space jams as well as urbanized funk. Carnuba is not to be reckoned with, for they pack laser beams. And keep a look out for Carnuba coming to a venue near you. Their motivating music is only enhanced when forged with the charismatic vocals of Brandon Webb. Listening to their full length CD you can hear that the music is integrated with the influences of every musician who has ever walked this green earth. From Structured Indie songs, to African High Life, to Reggae, to explosive Jams, and then polarized with a flair of Acoustic Punk, their song writing ability is exceeded only by their presence on the stage.
