

Mp3 Professor Nineteen - The Diversity Of Flowers

[DOWNLOAD HERE](#)

instrumental-jazzy-ambient-lounge-chillout-new age 12 MP3 Songs NEW AGE: Ambient, JAZZ: Smooth Jazz Details: Professor Nineteen Using this name as his alter ego, George Kochbeck, well known as singer/songwriter and filmscore composer, is setting up a brandnew series of Cds with instrumental music. The first release now is: The diversity of flowers. This album is a collection of instrumentals in a very ambient, loungy, jazzy, chilly style. People at Itunes call it new age. Well, decide yourself. All tracks on the album reflect feelings and thoughts about living in the countryside, about the beauty of nature, about the beauty and the diversity of flowers. Although it is a 100 computer based production, the music sounds so acoustic that you wouldnt associate with any electronics.
