Details: Sadahnmo is a jazz guitarist, electronic composer and a devout innovator from India, the land of the ethereal raga. His music fuses sounds which are superficially robotic yet powerfully human. The melodies and soundscapes seem scintillating and everlasting. His music can be labelled as a motley of unpredictable psychedelic harmonies and glitchy break-beats with the groovemeter ticking at the max and a tinge of ambience topping it up. Being formally trained in the tabla, his groove is impeccable.
