Step-by-step, evidence-based guidance on good practice during labor is given, including fetal and maternal monitoring, pain relief, and the prevention and timely correction of everyday labor disorders. It leaves no aspect of childbirth practice untouched. Included are guidance on adequate pre-labor education, psychological support, and well-defined birth-planning - including strict diagnoses and timely corrective measures in abnormal labor, and constant audit of all procedures. The birth-plan promotes team spirit between obstetricians, midwives and nurses, good communication, and sound organization. Proactive Support of Labor strikes a new balance between natural birth and intervention and invariably enhances women's satisfaction with the childbirth experience.
