

Javascript Magic

[DOWNLOAD HERE](#)

Here's an EASY way to add "PHAT" to your web pages instantly! Even if you have NO experience in working with scripts, I'm going to show you step-by-step how to add ANY of these scripts to your web page. Of course, the "programmers" will HATE ME, but it's time you discover just how simple it is. First, a little background. I am NOT a programmer. I am just an average joe who decided to take a leap of faith. I somehow didn't believe working with DHMTL, JavaScript, and CSS could be "THAT" hard. In ways, I guess my ignorance proved to be an advantage. Now it's YOUR advantage. I compiled and collected the top 33 scripts from around Cyberspace (no I DON'T write code) so that you have a ready reference for whatever you choose to add to your pages. Almost all the scripts can be used by just copying the code I provide you in the link (you must use NOTEPAD or a good text editor -- see 'software') and adding it to your code on YOUR web page. Really it's that simple. And it's very easy to use this book. Simply click on any of the red links on the left side of the page. But really, I suggest you use the 'next page' link below...to be sure you don't miss ANY of the great scripts. Ready to get started? Let's GO... Tags: css
