...elemental enchantress...lustrous songstress...weaving song and the spoken word into provocative performance... 10 MP3 Songs FOLK: Power-folk, FOLK: Political Details: ...San Francisco-based elemental enchantress Anne Carols music focuses on reawakening the intrinsic link humans share with the natural world and with one another through an eloquent weave of song, spoken word and a percussively played acoustic guitar. She sings with great love to the wilderness. Her songs call for justice in times of war. She gives voice with an edge of purpose to that which has been silenced and sings sweetly to the unuttered longings of the heart. From activist outcries to seductive melodies, her music invokes courage and is a well of renewal.
