

Mp3 Danny Praz - Sanctuary

[DOWNLOAD HERE](#)

Excellent Guitar Instrumental Rock: "A guitar knockout. A 10," raves TAXI. 10 MP3 Songs ROCK: Instrumental Rock, ROCK: Classic Rock Details: Sanctuary has received air play on 115 stations across the US, Canada and France. "Danny is a phenomenal guitarist!" Mat Matlack, Space 380 "Danny's guitar work is EXCELLENT!" Eric Rosen, Independent A&R "I am impressed by the great guitar playing. The lead stuff is cool and interesting." Tom Watson, Brookhaven Press "Good rock and roll with an ever so slightly dark and dangerous feel. The production is solid and the guitar playing shows real talent!" TAXI #158 I heard back from a fan that purchased a copy of my CD from CD Baby. He is major fan of guitar instrumentals, and owns more than 1000 different CD in this genre. He told me: "This CD is incredible. It ROCKS! It is one of the best guitar instrumental albums I have ever heard, and I should know. I own and have listened to more than 1,000 guitar instrumental CDs. Your CD is right there with the best of them!" I appreciated this great review and wanted to share it with you. One thing I can tell you is you won't be disappointed in these songs. There is only one ballad on the entire CD, while most others in this genre load up on ballads. I keep you moving from start to finish. Just listen! I love to play guitar! This is one thing anyone can hear when they listen to this CD. I can tell you my influences--Jimmy Page, Joe Perry, Jimi Hendrix, Ted Nugent, and Randy Bachman. I could tell you the technical stuff--that I have mastered rock guitar, that I have the chops, the speed, techniques and the tricks. But the real reason why I am continually referred to as a "great guitarist" is that I play with emotion. I put my heart and soul into every lead, every rhythm and every bass line I play. If the song is serious, like "The Creek" or "Broken," you'll feel the intensity. If it is lighthearted and fun, like "He Don't Look Good" or "Jungle Madness," you'll feel that too. I also believe that every song, especially instrumentals, should be catchy. You'll be able to "get" these songs after only one listen. If you want to hear great guitar hero stuff, it's in this CD. If you want to

hear catchy, memorable songs, they are in the CD. And if you want to feel the music, just like I did as I played it, just listen. Let me know what you think! Good, bad or whatever, I want to hear from you! Thanks for checking this out! See THROWBACK at throwbackweb.com
