AFRI-FUNK:a distinctly original funkandgroove take on Fela-Kuti style afro-beat. Superkali's credo- You'll enjoy listening, but you will dance. 11 MP3 Songs WORLD: World Fusion, JAZZ: World Fusion Details: Superkali plays Afrifunk: a distinctively organic, American take on the hyptnotic poly-rythmic style of the godfather of Nigerian Afro-beat, Fela Kuti. Drawing on its members' collective backgrounds in funk, jazz, and world music, Superkali's original material burns a groove unlike any other band in America. The Seattle Weekly writes, "A lot of bands who claim to fuse disparate musical influences are big fat cheaters. Instead of actually synthesizing the different sounds into a coherent whole, they essentially just take turns slapping together cliched riffs from each....(This band) shows that it doesn't have to be this way....Superkali really do deliver a supercharged mixture of funk, Afro-beat, and jazz."
