Easily Build Unlimited Auto-Updating Niche Video Clip Websites Using YouTube Videos Video sites are hot and their popularity is sure to explode in 2009. People love looking at video clips, and the search engines love video clip websites. Now you can cash in on the video craze by automatically compiling topic (niche) related video websites that people will love! Now you can profit from the online video site craze, with ease, and with very little expense! Introducing the VideoClipWebsites Builder Script!!! Again, you really dont want to compete with the big video hosting sites. What you really need to do is focus on is building several topic related (niche) video sites. Lets imagine you are like me, and love fishing - maybe you even already have a fishing related website. Imagine FTPing a few files to your web host, running a program in your browser, answering a few questions, and clicking a button to create a multiple page, fishing video clip website - its really that easy. The best part is, you dont ever have to update the site. Whenever new fishing related videos are posted on YouTube, your site will update with the latest videos automatically, and the search engines love sites that are updated often. Since the videos on your niche video pages are actually stored and run from YouTube, you get the benefit of displaying the videos, but

you dont have to pay for the video disk space or bandwidth. Each website and each web page is search engine optimized, based on the video clips being viewed. Each webpage contains Google AdSense code strategically placed for maximum click throughs. However, you are not limited to AdSense advertising. You can modify the Advertising Blocks to advertise anything you want. Maybe a few affiliate products related to your topic, perhaps a banner to your main site, or you could even charge a monthly fee to others who want that ad block space. Each page contains Web 2.0 Social Bookmarking code to allow your visitors to easily bookmark and share your webpages with others. Each page contains a link, you specify, in the footer of the page, and you can change it at any time. This will create traffic to the link you specify, plus incoming links - search engine food! Imagine easily adding video to any websites you currently own - your visitors will love it and the search engines will love it. Adding niche related video clips will increase the value of your web real estate and generate more repeat visits. Imagine creating unlimited new sites, or adding video pages to your current sites, with each site taking one to two minutes to create. Lets say you it takes you 5 minutes total to create a new video website, or set of new video pages. It should take less than 5 minutes, but well use 5 minutes in this example. In just one hour per day you could create 12 sites per day. So, if you spent one hour per day building video sites, for 20 days in your first month, that would be 240 video sites after your first month. Now lets assume each site averages only 30 cents per day, that would be \$72 per day, or \$2160 per month. The next month you could build more sites, or work on getting more traffic to your current video sites. Imagine your income growing as your virtual web real estate continues to grow. You could have unlimited money making web pages, on several topic specific websites, that visitors and search engines will love. Get the VideoClipWebsites Builder Today and start creating a virtual empire of video clip websites. Ill even show you how to make the most out of your video sites, how get your site listed in Google in about 24 hours, and how to use Web 2.0 techniques to build traffic to your sites. The script is very easy to install, and takes no work to maintain. Just install it and let it go! No MySQL database required Auto update content from Youtube website Use Youtube new GData API, no need to get Youtube developer key Include User profile section, uploaded videos, favorite videos, and user playlist Search for Videos by name, tags or author Search engine friendly URLs Create multiple pages based on additional keywords Fast and low resource, using CURL (optional)) and cache files Built in automatic bad word filter Powerful templates based on the Smarty Template engine Easy to use configuration screen o User Configurable Main Video Keyword o Order of

Videos (Relevance, Rating, Updated time, or Number of times viewed) o Number of Videos per page o AdSense ID o Link in each pages footer o Link text, for link in each pages footer o VideoClipWebsites affiliate link o Additional video site keywords (Creates additional video pages, and menu links to additional video pages) You will also be able to earn money by referring people to the VideoClipWebsites affiliate program - every page you create will have your affiliate link encoded in your pages.
