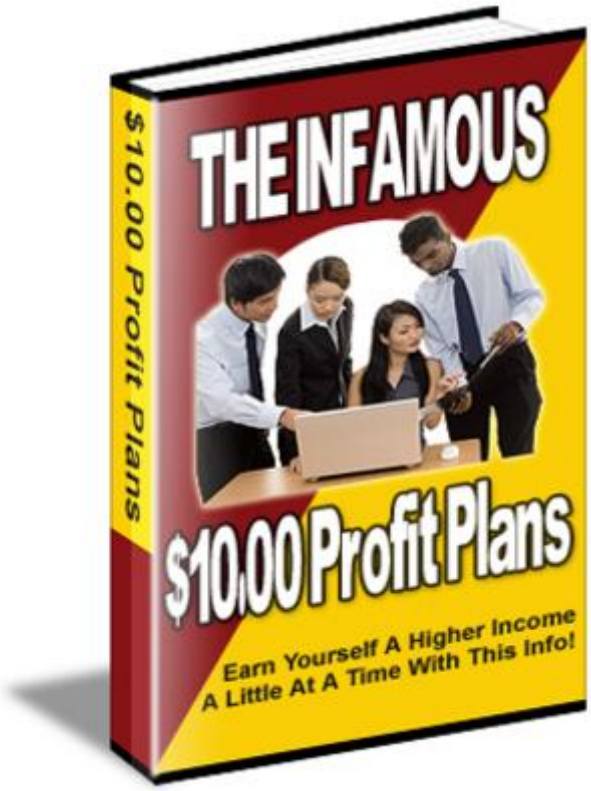
10 Dollar Profit Plans



DOWNLOAD HERE

Dear Struggling Netrepreneur, Have you heard the phrase. . .Work Smarter Not Harder? Or how about. . . Sell Higher Priced Products To Cut Down Your Work-Load? Well, you are about to discover why those phrases pose a more difficult scenario than you might think right on this very page. So, if youve been struggling to make money selling information products, or digital products, then I urge you to continue reading. Every once in a while you will hear from many an online digital info product seller that you must sell higher priced items to decrease your workload. But, do you realize how difficult selling a $80-$150 product really is?!? If you have not made a name for yourself, or you are someone just beginning in the info-product industry, or even someone fairly known, it will still be quite impossible for you to gain the trust of customers to shell out that kind of money. Especially to someone theyve never heard of before. That is why to see any money when you begin, you must set your goals lower. Yes. I said l-o-w-e-r. Bet you never thought youd hear someone tell you that, huh?!? But its the honest to goodness truth. If you hope to see any type of cash flow from selling info products online, then you must be realistic about how much you will be able to earn. And in The Infamous $10.00 Profit Plans ebook, you will learn not one, not two,

but five different methods to pull in $10.00 bills over and over again. Why? Becuase these methods have been proven to work. Time and time again. And thats the first step to success. Having methods available to you that will get the job done. It is much more logical, and much easier, to get a stranger to invest $10.00 in one of the products you are selling than it would be to get them to part with, say, $100.00. Would you give one hundred dollars to someone youve never met before that was in business for themselves? Doubtful. But, if you were asked for just $10.00 for some type of product you wanted, would you be less worried about parting with it? Of course! Because its a very small investment. Thats the psychology behind these methods. And they do work. Maybe not every time, but a majority of the time they will.
