

Information Theoretic Learning

[DOWNLOAD HERE](#)

Information theory, machine learning and reproducing kernel Hilbert spaces.- Renyi's entropy, divergence and their nonparametric estimators.- Adaptive information filtering with error entropy and error correntropy criteria.- Algorithms for entropy and correntropy adaptation with applications to linear systems.- Nonlinear adaptive filtering with MEE, MCC and applications.- Classification with EEC, divergence measures and error bounds.- Clustering with ITL principles.- Self-organizing ITL principles for unsupervised learning.- A reproducing kernel Hilbert space framework for ITL.- Correntropy for random variables: properties, and applications in statistical inference.- Correntropy for random processes: properties, and applications in signal processing.- Appendix A: PDF estimation methods and experimental evaluation of ITL descriptors.
EAN/ISBN : 9781441915702 Publisher(s): Springer, Berlin, Springer, New York Discussed keywords: Informationstheorie Format: ePub/PDF Author(s): Principe, Jos C.
