

Mp3 Cyberia - Welcome To Cyberia

[DOWNLOAD HERE](#)

An eclectic mix of electronic music ranging in style from house to downtempo to hip hop to...well, you get the picture 13 MP3 Songs ELECTRONIC: House, ELECTRONIC: Down Tempo Details: Welcome to Cyberia... an eclectic place full of eccentricities; a place as diverse as the Earth itself. A place that derives its energy, its inspiration, its power from one Source; and the primary purpose of this land is to experience more of this power and give itself in truth to the continual worship of the Source thereof. At any given time, the mood can change, the eccentricities display themselves. Nevertheless, the underlying themes of pursuit and worship remain, resulting in an intense desire for this land to open its gates and share this Source with all who seek it. The door is open... Come and see. Thanks for checking out my debut CD, Welcome to Cyberia! My name is Jonathan Barlekamp and I have an intense love and interest in music, along with a more important intense love and interest in the LORD. By the blessings He has given me I hope to share with you, through electronic music, the passion I have for worshipping Him. This album is primarily instrumental in nature; there are some vocals, but mainly it is either good background music or, if you're like me, you will enjoy listening closely to the varying beats, sweeping pads, and pulsing synth leads. Songs range in style from the highly danceable, house-like Mercy Drops, to the cool, chilled out Jazzy, to the smooth and serene Ph47. All listeners can appreciate this CD, regardless of beliefs. Make no mistakes, I am a Christian and I make music with the intent to glorify God, but Welcome to Cyberia is instrumental in nature and is easily enjoyable by all. On a more personal note, I am 23 years old and married to a beautiful woman named Sarah. She plays with me in a worship band for the youth in our church. We have a dog named Carrot (don't ask), and love watching X-Files when we're not making or listening to music. Thanks again and please visit my website: welcometocyberia.com
